Sydney NSW 2000

Dear Sir,

## **TOUQUOY GOLD PROJECT DRILLING UPDATE**

---

Diamond Ventures (DDV) is pleased to announce that it has commenced a 9-hole diamond drilling programme for 700m to delineate and define additional in-pit resources within the Touquoy Gold Deposit. Six of the holes will complete a cross-section (21775E) through a lightly drilled area of the deposit. The drilling is planned to be completed by Christmas.

In addition several traverses of 25m-spaced open percussion holes will be completed concurrently to follow up Anomalies A and D identified during the previous percussion drilling programme. Anomaly A is located immediately west of the Touquoy Gold Deposit and forms part of a previously identified 4.5km long gold-anomalous corridor. Anomaly D is located 12km ENE of Touquoy near the eastern end of the property. As previously these percussion holes are drilled to a depth of about 20m or less to penetrate the transported overburden (sand and gravel) to sample the bedrock beneath and provide an efficient means to identify further diamond drillhole targets.

It is anticipated that assay results from both programmes will be available by the end of January.

Yours sincerely,

**Wally Bucknell**  
Executive Director
