LETTER FROM THE CHAIRMAN

Dear Atlantic shareholder,

Despite the difficult global financial conditions and depressed asset value levels generally over the past 12 months, the Directors believe that the investment attributes and prospects of the Company's Touquoy Gold Project and other Nova Scotia gold interests have only improved. During this period, the gold price in US dollar terms has reached unprecedented highs and the Directors believe that the gold price over the next 18 months or so could test levels above the current US\$900-950 per ounce range. The Directors believe that now is an excellent time to invest in the prospect of near-term gold production.

Atlantic's aim is to leverage management's prior successes in the Western Australian goldfields and bring recognised Western Australian gold exploration, resource development and mining techniques to the Nova Scotian goldfields. Atlantic has a well advanced gold project in Nova Scotia which the Directors believe positions the Company to consolidate and take a dominant role in gold production within this region.

The Directors consider that the competitive advantages of Atlantic's open pit Touquoy Gold Project are compelling. These include a low waste: ore ratio, excellent metallurgy, soft ore with no acid rock drainage, close grid power, a local workforce and existing and readily accessible infrastructure. In particular, the grant of environmental assessment approval is a major step forward for the Project. Subject to completion of the feasibility study, finalisation of remaining permits and securing of project financing, Atlantic is scheduled to be pouring first gold within 12 months of commencement of site development. The underlying characteristics of Touquoy make this an attractive and enduring future investment in Nova Scotia's emerging gold mining industry.

The Offer to participate in a renounceable rights issue that is fully underwritten by Patersons Securities allows shareholders an opportunity to progress the above benefits (details of the Underwriting Agreement are set out in section 7.7).

By raising approximately \$3.3 million (before costs and expenses), Atlantic will ensure that it is well resourced to achieve the next important milestones in readiness for full project financing and development being:

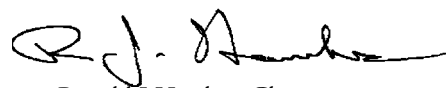

- completion of the final feasibility study and permitting documentation and acquisition of additional surface titles at Touquoy;
- further development of Atlantic's equally promising gold project at Cochrane Hill; and
- satisfaction of other general corporate purposes including the repayment of corporate borrowings and undertaking regional exploration initiatives.

Through these activities, Atlantic's corporate objectives to internally generate cash flow through profitable gold production and to build its regional resource and reserve inventory in Nova Scotia will be optimally progressed. Our exploration successes should continue to extend the Company's projected production life.

While Atlantic remains well supported by its existing loyal shareholders, the Directors consider that it is prudent in this environment to extend the breadth of this shareholder base. In order to achieve that aim, the Directors, who already hold an aggregate 14% interest in the Company expect to participate in the Offer to relatively modest levels. The Directors have not yet finalised their precise level of participation in the Offer.

To apply for New Shares under the Offer, you must complete and return the Entitlement and Acceptance Form accompanying this Prospectus, with payment, no later than 5:00 pm on Friday 1 May 2009 (unless extended).

I invite you to read the Prospectus in its entirety. On behalf of the Board of Atlantic, I commend this Offer to you and encourage your participation. If you have any doubt as to what to do, you should promptly consult your professional adviser.

Ronald J Hawkes, Chairman

1 April 2009

- completion of Atlantic's final feasibility study and permitting documentation for its Touquoy Gold Project;
- acquisition of additional surface rights associated with the Touquoy Gold Project;

Refer to section 2.3 for further details.

What is my entitlement?

- take up all or part of your Entitlement;
 - sell your Rights in full or in part on ASX;
 - transfer all or part of your Rights to another person other than via ASX;
- or
- do nothing and allow your Entitlement to New Shares to lapse and may be taken up by the Underwriter.

You may also apply for Additional Shares in excess of your Entitlement.

Each of these options is further described in section 3.

How do I exercise my Rights?

If you are an Eligible Shareholder, and you wish to subscribe for all or some of the New Shares and New Options making up your Entitlement (and Additional Shares in excess of your Entitlement), you must complete the Entitlement and Acceptance Form accompanying this Prospectus and forward it, with your Application Monies, to:

If you do not take up your Entitlement or sell or transfer your Rights, your Entitlement will lapse and form part of the Shortfall to be taken up by the Underwriter. This will result in your shareholding in the Company being diluted.

For further details of these options, see sections 3.2 and 3.3.

You should carefully consider these factors in light of your personal circumstances (including financial and taxation issues) and seek professional advice from your accountant, stockbroker, lawyer or other professional adviser before deciding whether to invest. The New Shares and New Options offered under this Prospectus should be considered as speculative.

What are the tax implications of the Offer?

The Board considers that it is not appropriate to provide advice regarding the taxation consequences of subscribing for New Shares and New Options under this Prospectus in any tax jurisdiction. Accordingly, shareholders should seek tax advice specific to their individual circumstances.

The number of New Shares and New Options that you are entitled to (that is, your Entitlement and the number of Rights you have) is shown on the Entitlement and Acceptance Form.

The number of New Shares to which partly paid shareholders are entitled is proportionate to the amount paid up on the partly paid Shares, being 9 cents of the 20 cents required to be paid.

Fractional entitlements to New Shares and New Options will be rounded up to the nearest whole number.

The Record Date for the purpose of the Offer is 5:00 pm on 9 April 2009. Persons with registered addresses in Australia or New Zealand, who are registered as the holders of Shares on the Record Date, will be entitled to participate in the Offer. You may apply for Additional Shares in excess of your Entitlement, however there is no guarantee that you will be issued those Additional Shares. Your options in relation to how you can deal with your Entitlement are more fully set out in section 3.

2.5 Closing date

The Company will accept applications from the date of this Prospectus until 5:00 pm on 1 May 2009 or such other date as the Directors in their absolute discretion may determine subject to the requirements of the ASX Listing Rules and the consent of the Underwriter (if required).

2.6 Total number of New Shares and New Options to be issued

The total number of New Shares and New Options to be issued pursuant to this Offer will be approximately 82.9 million and 23.3 million respectively (the exact numbers will depend on rounding-up of individual holdings).

The gross proceeds (before costs and expenses) of this Offer will be approximately \$3.3 million. The costs and expenses of the Offer are expected to be approximately \$350,880 exclusive of GST.

2.7 Issue of New Shares and New Options

Atlantic expects to issue the New Shares and New Options on or before 11 May 2009. No issue of New Shares and New Options will be made unless permission is granted for quotation of the New Shares and New Options on ASX.

Application Monies will be held in trust for applicants in a subscription account until New Shares and New Options are allotted to such applicants. Interest earned on Application Monies will be for the benefit of Atlantic and will be retained by Atlantic irrespective of whether New Shares or New Options are issued.

2.8 Withdrawal of Rights Issue

The Company, in consultation with the Underwriter, reserves the right not to proceed with the Rights Issue at any time before the issue of the New Shares (and attaching New Options) to Eligible Shareholders. If the Rights Issue does not proceed, the Company will return all Application Monies as soon as practicable after giving notice of its withdrawal, without interest.

2.9 ASX quotation

Atlantic will apply for admission of the New Shares and New Options to quotation on ASX within 7 days after the date of this Prospectus. If ASX does not grant Official Quotation of the New Shares and New Options within 3 months after the date of this Prospectus, Atlantic will not issue any New Shares or New Options and will repay all Application Monies within the time prescribed under the Corporations Act, without interest.

2.10 Ranking

The New Shares will rank equally with existing Shares from the time they are issued. A summary of the rights attaching to the New Shares (and existing Shares) is set out in section 7.4.

A summary of the rights attaching to the New Options is set out in section 7.5. The New Options will constitute a new class of securities in Atlantic.

2.11 Rights trading

Rights are renounceable, which means that Eligible Shareholders who do not wish to take up all or part of their Entitlement may choose to sell their Rights on ASX. Information on how Rights may be sold on ASX is set out in section 3.2.

You may also transfer all or some of your Rights to another person other than on ASX. Details of how you may effect this transfer are found in section 3.3. Any portion of your Entitlement that you decide not to accept and that you do not trade, will lapse and become part of the Shortfall.

Rights trading is scheduled to commence on ASX on 3 April 2009 and cease on 24 April 2009.

2.12 Market prices of Shares

The lowest and highest market sale prices of Shares on ASX during the 3 months prior to the trading halt on Monday 23 March 2009, and the respective dates of those sales, were:

- highest price was 7.9 cents on 2 February 2009; and
- lowest price was 5.0 cents on 21 January 2009.

The last sale price for Shares on ASX immediately prior to the trading halt on Monday 23 March 2009 was 7.0 cents.

The last sale price for Shares on ASX immediately prior to the date of this Prospectus (being the date the Rights Issue was announced to ASX) was 5.0 cents.

2.13 Ineligible Shareholders

This Prospectus contains an Offer to Eligible Shareholders with a registered address in Australia or New Zealand. This Offer is not extended to, and no New Shares or New Options are offered or will be issued to, persons with registered addresses outside of Australia and New Zealand.

Shareholders with a registered address in Australia or New Zealand who hold Shares on the Record Date on behalf of persons who are not resident in Australia or New Zealand are responsible for ensuring that taking up the New Shares and New Options under the Offer does not breach securities law in the relevant overseas jurisdictions. Return of a duly completed Entitlement and Acceptance Form will be taken by Atlantic to constitute a representation that there has been no breach of such laws.

Nominee to sell Rights of Ineligible Shareholders

The Company has appointed the Underwriter, on normal commercial terms, as nominee to sell the Ineligible Shareholders' Rights (Nominee).

The Nominee will only sell the Ineligible Shareholders' Rights if there is a viable market for the Rights and a premium over the expenses of the sale can be obtained. Any such sale will be at a price and in a manner that the Nominee will determine in its absolute discretion. The ability to sell the Ineligible Shareholders' Rights and the price obtained will be dependent, amongst other things, on market conditions. The proceeds of the sale (in Australian dollars) will be distributed to the Ineligible Shareholders for whose benefits the Rights have been sold in proportion to their shareholdings as at the Record Date (after deducting the costs of the sale and the costs of distributing the proceeds).

There is no guarantee that the Nominee will be able to sell Ineligible Shareholders' Rights on ASX and Ineligible Shareholders may receive no value for the Rights. Both the Company and the Nominee take no responsibility for the outcome of the sale of Ineligible Shareholders' Rights or the failure to sell such Rights.

If there is no viable market for the Ineligible Shareholders' Rights, their Rights will be allowed to lapse and become part of the Shortfall.

2.14 Taxation implications

The Board considers that it is not appropriate to provide advice regarding the taxation consequences of subscribing for New Shares and New Options under this Prospectus in any tax jurisdiction. Atlantic recommends that Eligible Shareholders consult their own independent accountant, legal adviser or other professional adviser regarding the taxation treatment of subscribing for and disposing of New Shares and New Options under this Rights Issue. Atlantic and its officers and advisers do not accept any responsibility or liability for any taxation consequences of Eligible Shareholders subscribing for and disposing of New Shares and New Options.

2.15 Entitlement and Acceptance Form is binding

A completed and lodged Entitlement and Acceptance Form or Shortfall Application Form, together with the Application Monies for the number of New Shares and New Options applied for, cannot be withdrawn and constitutes a binding application for the number of New Shares, New Options and Additional Shares (if any) specified in the Entitlement and Acceptance Form or Shortfall Application Form on the terms set out in this Prospectus. The Entitlement and Acceptance Form or Shortfall Application Form does not need to be signed to be binding.

Atlantic will not process applications until the expiry of the Offer Period and no agreement to issue the New Shares or New Options arises until the expiry of the Offer Period. No preference will be conferred on applications on the basis of when those applications were received in the Offer Period.

If an Entitlement and Acceptance Form or Shortfall Application Form is not completed correctly, Atlantic in its absolute discretion can reject it or treat it as valid. Atlantic's decision as to whether to accept or reject an Entitlement and Acceptance Form or Shortfall Application Form or how to construe, amend or complete it, is final.

4 OVERVIEW OF ATLANTIC

4.1 Background

The Company was incorporated on 17 November 1993 and was listed as Diamond Ventures NL on ASX on 29 March 1994. In January 1999, control of the Company passed to the present management interests and since that time corporate focus has been directed to exploration for gold with the objective of increasing shareholder value through the discovery of gold reserves and the establishment of profitable mining operations. With this objective developing momentum in Atlantic, Canada, the company name was changed to Atlantic Gold NL in June 2005.

In May 2003, Atlantic acquired an option to earn a controlling interest in the Touquoy Gold Project located 100km from Halifax, Nova Scotia, Canada. By the end of 2005, Atlantic had acquired a 60% interest in the Touquoy Gold Project. An additional 15% interest can be acquired in the property outside the general area of the known resource by securing project financing.

With the conclusion of an option agreement with Scorpio Mining Corporation in respect of the Cochrane Hill advanced exploration property, Atlantic now has control over more than 1.2 million resource ounces (more than 720,000 ounces on a nominal equity basis) of contained gold resources located within an 80 km radius of the proposed Touquoy Gold Project processing plant.

Subject to receipt of the required approvals to mine from the Nova Scotia Government, the provision of appropriate project funding and the accommodation of those risks identified in section 6, Atlantic anticipates that the Touquoy Gold Project processing plant will be operational at full capacity near the middle of 2010.

4.2 Atlantic's strategy

Atlantic's immediate strategic business objectives are to:

- develop a profitable mining operation at the Touquoy Gold Project site located 100 kilometres from Halifax in Nova Scotia, Canada;
- upgrade gold resources and develop reserves at the Cochrane Hill advanced exploration property; and
- continue to build a valuable asset base of gold mining and exploration properties in the region through exploration activities and acquisition opportunities which may become available from time to time.

The key to Atlantic's growth lies in its ability to develop the Touquoy and Cochrane Hill Gold Projects into profitable and sustainable mining operations. Additionally, growth will also come from identifying, discovering, acquiring and developing attractive resources within the Nova Scotia gold province and beyond to a level where Atlantic has a strong and stable operating cash flow and profitability through environmentally sustainable mining operations.

If Atlantic meets its short-term goals it will have:

- concluded a final feasibility study that will provide a basis for the raising of funds required to develop the Touquoy Gold Project into an operational gold mine;
- received all remaining permits needed to develop the Touquoy Gold Project and construct the only substantial gold processing plant in Atlantic, Canada; and
- increased its resource inventories, including those at Cochrane Hill Gold Project, within an economically strategic distance of the Touquoy Gold Project.

4.3 Use of funds

The Offer seeks to raise approximately \$3.3 million before costs and expenses. These funds will be used for general corporate purposes of Atlantic including but not limited to:

- completion of Atlantic's final feasibility study and permitting documentation for its Touquoy Gold Project;
- acquisition of additional surface rights associated with the Touquoy Gold Project;
- further development of the Cochrane Hill Gold Project;
- follow up of regional exploration targets elsewhere in Nova Scotia; and
- repayment of outstanding corporate borrowings owed by Atlantic.

The intended use of the funds raised by the Offer is summarised in the table below.

ESTIMATED APPLICATION OF FUNDS	\$
General corporate purposes including, but not limited to:	2,966,723
<ul style="list-style-type: none"> • the completion of the feasibility study and permitting documentation for the Touquoy Gold Project; • the acquisition of additional land surface rights associated with the Touquoy Gold Project; • the further development of the Cochrane Hill Gold Project; and • follow up of regional exploration targets elsewhere in Nova Scotia; and • repay corporate borrowings 	
Costs	350,880
Total	3,317,603

The actual amount of expenditure may vary materially from the table above, depending on a number of factors, including (but not limited to) regulatory requirements and developments in the projects. The ultimate use of funds may vary from the activities in the above table at the discretion of the Board, depending on future developments and in order to maximise the commercial value of the Company's project portfolio.

Previous capital raisings have not impacted on the exercise price of the Options.

6 RISK FACTORS

6.1 Introduction

There are a number of risk factors which could adversely impact Atlantic's performance and the value of its Shares. Eligible Shareholders should consider these risk factors and should consult their stockbroker, accountant, lawyer or other professional adviser before deciding whether to subscribe for New Shares and New Options under the Offer.

The following is not an exhaustive summary, but points to some of the risks that are peculiar to a company involved in mining and exploration. Any one or a combination of such risks could affect the Company adversely and thus the value of any investment in the Company. The Board is unable to speculate as to the extent of such adversity, and thus an investment in the Company should be regarded as speculative.

6.2 General risk factors

Economic conditions

The performance of Atlantic may be significantly affected by changes in economic conditions, and particularly conditions which affect the mining sector. Profitability of the business may be affected by factors such as market conditions, interest rates, inflation and global gold prices.

Geo-political factors

Atlantic may be affected by the impact that geo-political factors have on the various world economies, in particular the Australian and the Canadian economies or on financial markets and investments generally or specifically.

Australian and foreign government policies & legislation

Atlantic may be affected by changes to government policies and legislation (in Australia, Canada and other foreign jurisdictions) including those relating to property, the environment, superannuation, taxation, the regulation of trade practices and competition, government grants and incentive schemes.

The Company's activities are subject to many regulations and approvals including mining and environmental regulations.

Share market conditions

Atlantic, being a company listed on ASX, is subject to the market forces that influence the broad share market trends and the price of securities of individual companies. Recent global political and economic events, including the continuing terrorist threats and the global financial crisis, may cause share price fluctuations in the Australian share market and globally. Accordingly, assuming that the New Shares are granted Official Quotation on ASX, they may trade on ASX at higher or lower prices than the Issue Price.

War

Anywhere in the world there could be an outbreak of hostilities in a particular region. There could be a resultant material adverse effect on the business, financial condition and financial performance of the Company.

Competition Risk

The structure of the markets in which the Company operates may alter or new competitors may enter some or all of those markets, resulting in increased competition. Increased competition may result in lower prices, operating margins and profit for the Company.

Operational Risks

Other risk factors include those normally found in conducting business, including litigation resulting from the breach of agreements or in relation to employees or contractors (through personal injuries, industrial matters or otherwise) or any other cause, including strikes, loss of service of key management or operational personnel, non-insurable risks, delay in resumption of activities after reinstatement following the occurrence of an insurable risk and other matters that may interfere with the business or trade of Atlantic.

6.3 Specific risk factors

In addition to the above, there are a number of specific risks concerning Atlantic of which potential investors should be aware. The following is not an exhaustive summary, but points to some of the risks that are specific to Atlantic. Any one or a combination of such risks could affect Atlantic adversely and thus the value of any investment in Atlantic.

Like other companies at a similar stage of development, the Company faces a number of risks, both general and project-specific, including, but not limited, to the risks set out below.

Capital of the Business

If unexpected events and consequent losses deplete the capital of Atlantic, there can be no assurance that the capital markets will provide the capital and/or debt funds necessary to sustain Atlantic.

Taxation Risks

Atlantic seeks to comply with all taxation laws and seeks professional advice on its taxation compliance programme. Nevertheless, the complexity of taxation laws creates a risk for Atlantic.

Exploration and mining risks

Mineral exploration is a highly speculative activity. There are risks involved in the development of ore bodies and the production of minerals. Factors such as sample representivity, continuity of mineralisation, evaluation techniques utilised for the estimation of mineral resources and ore reserves may impact on the accuracy of the estimation and on production forecasts and costs. Production levels and costs can also be adversely affected by factors beyond the control of management.

The Company has not managed a mining operation in Canada. However, two of the Directors have considerable experience in planning and managing exploration activities in Canada. The Company will also use its extensive Australian mining experience and its network of well respected consultants and contacts, together with Canadian professional expertise to assist in making commercial judgements in respect of its Canadian activities.

Market conditions

The ability of the Company to benefit from the production of minerals, the acquisition or divestment of mineral properties, and investments in or mergers with resource companies may depend, to some extent, on market factors. Most of the Company's revenues will be derived from the sale of gold. As a consequence, the Company's earnings and cash flows will be affected by changes in the price of gold. World market prices for gold and metals are subject to many variables and may fluctuate substantially.

The factors that will influence the price of gold include, but are not limited to, supply and demand, forward selling, general world economic and political conditions and the outlook for interest rates, exchange rates, inflation and other commodity prices. These factors may have an adverse affect on the Company's exploration, development and production activities as well as its ability to fund those activities.

Legislative amendments

There may be changes to the Income Tax Assessment Act, Corporations Act or other legislation or government policy in Australia or overseas, which may be detrimental to participants or investors in the resources industry.

Native title

It is possible that there may exist on tenements in which the Company has an interest, or may acquire an interest, a form of native title which could result in exploration/mining restrictions and/or claims for compensation.

Touquoy Gold Project

Development of the Touquoy Project is dependent upon the necessary approvals being obtained from the Nova Scotia Government and the economics of the Touquoy Gold Project.

As at the date of this Prospectus, Atlantic has submitted its formal applications for Industrial Approval and a Mining Lease. Industrial Approval is conditional upon access to all surface titles and grant of the Mining Lease will be subject to posting of a reclamation bond. Receipt of Industrial Approval and granting of the Mining Lease will complete the remaining regulatory permission necessary to commence site development.

As reported in the December 2008 quarterly report, acquisition of certain surface rights of land is required and is one of the purposes of this fundraising. The application for Industrial Approval submitted in mid-July remains under review and that approval is subject to the Company's establishment of ownership or access rights to all surface titles at the site and submission additional technical data.

The application for a Mining Lease also continues to be reviewed with a formal request for further details pertaining to resource estimation, pit design and reclamation plan having been made. The granting of the Mining Lease is subject to lodgement of a reclamation bond, the amount of which is yet to be advised.

Until these approvals are obtained and certain surface land titles acquired, then full development of the Touquoy Gold Project will not be able to proceed. If there are significant delays in obtaining the required approvals then these delays may adversely impact the economics of the project and Atlantic's ability to successfully complete further fundraising. Delays in gaining the required approvals increase the risk of a change in the general risk factors, in particular the economic outlook, which may adversely impact the economics of the Touquoy Gold Project.

If there are significant adverse movements in economic factors such as the gold price and/or interest rates the economic viability of the Touquoy Gold Project may be adversely impacted, and development of the Touquoy Gold Project may be delayed or not be able to proceed.

Financial risks

The Company may seek to acquire further assets and businesses, and form strategic alliances, to develop its projects. The ability of the Company to develop the Touquoy Gold Project will depend in part on its ability to raise funds (including under this Offer) or to secure appropriate funding arrangements or both. Various avenues to finance Atlantic's current and longer term needs are being explored. However, no assurances can be given that such funding will be available, or that it will be available on terms acceptable, to the Company. This may adversely affect the Company.

Key employee risks

The future success of the Company may depend in part on its continued access to highly qualified scientific, technical and managerial personnel. Competition for such staff is intense. Further, much of the intellectual property and developed know-how resides in the Company's staff or those under contract. The loss of key staff could have a material adverse effect on the Company. While the Company seeks to ensure that the services of key personnel are retained, no assurances can be given that the Company will continue to retain and attract the key staff required by the business.

Risks related to investment in resources

Exploration and/or development of resources generally are subject to high levels of risk. Commodities are subject to high levels of volatility in price and demand.

Discovery risks

Any discovery of minerals may not be commercially viable or recoverable.

Climatic risks

The risk of adverse weather conditions may affect production and exploration.

Environmental risks

National and local environmental laws and regulations in Canada set various standards regulating certain aspects of health and environmental quality, provide for penalties and other liabilities for the violation of such standards and establish, in certain circumstances, obligations to remediate current and former facilities and locations where operations are or were conducted. The Company will minimise the potential impact of these laws and regulations by taking steps to ensure compliance occurs and, where possible, by carrying appropriate insurance.

Following cessation of production from operations, the Company may be required to participate in clean-up programs resulting from any contamination from operations in which it participates, removing disused plant and equipment and, where necessary, restoring land that has been disturbed in the course of operations. The cost of that clean-up may be considerable if operations result in significant environmental liabilities being incurred beyond what the Company would normally be required to provide in the form of a reclamation bond.

Production risks

There can be no assurance given that the Company will achieve production from any of its projects. The capacity of the Company to achieve production will depend on a wide range of factors including capital costs and operating costs that may be applicable to the individual projects and the capacity of the Company to fund those costs. If production is achieved then unanticipated problems may increase extraction costs and reduce anticipated recovery rates.

Risk as to profitability

Anticipated or estimated possible production levels may not be achieved, and even if achieved, may not result in the Company being profitable. The ability of the Company to pay dividends will depend on it generating revenue and then deriving sufficient after-tax profits to be able to do so.

Dependency on others

The future success of the Company may be dependent, in part, on the competency of organisations chosen from time to time to be operators of the Company's various projects and on each operator's capacity to manage day-to-day operations. The Company's future growth may also be dependent, in part, upon engagement of management capable of managing and expanding its operations beyond the present projects.

Contract Risks

All contracts carry risks associated with the performance by the parties thereto of their obligations as to time and quality of work performed.

Currency exchange risks

Revenue and expenditure in overseas jurisdictions are subject to the risk of fluctuations of international currency exchange markets. Foreign taxes, limitations on repatriation of earnings, compliance with foreign accounting and business laws, and cultural differences also carry a certain amount of risk.

Exploration, Drilling and Geological Risks

The delineation of geological conditions and the definition of mineral resources and ore reserves is a complex process requiring input from many areas of specialisation and a high degree of interpretation of results obtained from exploration programs. Resource estimates are therefore imprecise and may change when new information becomes available.

Whilst the Company proposes to use best industry practices to develop reliable estimates, there remains a risk that when mining commences, geological conditions could vary from those projected. In this case, there is a risk that geological conditions could adversely affect the ongoing operations and, in extreme circumstances, even result in the abandonment of a project.

Shareholders should consider that the investment in the Company is speculative and should consult their professional adviser before deciding whether to take up their entitlement.

- **Dividends**

Where dividends are payable out of Atlantic's profits they will be declared by the Board. Dividends declared will (subject to any special rights or restrictions attaching to a class of Shares created under any arrangement as to dividend) be payable on Atlantic Shares in accordance with the Corporations Act.

- **Transfer of Atlantic Shares**

A Shareholder may transfer Shares by a proper transfer effected in accordance with any computerised or electronic system established or recognised by ASX or the Corporations Act for the purpose of facilitating transfers in shares or by an instrument in writing in a form approved by ASX or in any other usual form or in any form approved by the Board. The Board may refuse to register a transfer of Shares where the refusal to register the transfer is permitted under the Constitution, the Corporations Act and the ASX Listing Rules.

- **Issue of Shares**

The Board may (subject to the restrictions on the issue of Shares imposed by the Constitution, the ASX Listing Rules or the Corporations Act) issue, grant Options in respect of, or otherwise dispose of further Shares as they see fit.

▪ **Winding up**

Upon a winding up of Atlantic, if the assets available for distribution among the members are insufficient to repay the whole of the paid up capital, such assets shall be distributed in such a way that the losses are to be borne by the members in proportion to the capital paid up or which ought to have been paid up at the commencement of the winding up.

If the assets available for distribution among the members are more than sufficient to repay the whole of the capital paid up at the commencement of the winding up, the excess shall be distributed among the members in proportion to the capital paid up or which ought to have been paid up. The distribution of property in this manner is subject to the rights of the holders of Shares issued upon special or preferential terms.

▪ **ASX Listing Rules**

Because Atlantic is listed on the official list of ASX, notwithstanding anything in the Constitution, if the ASX Listing Rules prohibit an act being done, the act must not be done. If the ASX Listing Rules require an act to be done or not to be done, authority is given for that act to be done or not to be done, and if a provision is required in the Constitution by the ASX Listing Rules, the Constitution will be treated as containing that provision. If any provision of the Constitution becomes inconsistent with the ASX Listing Rules, the Constitution will be treated as not containing that provision to the extent of the inconsistency.

7.5 Rights and Liabilities attaching to New Options

The rights and liabilities attaching to New Options offered under this Prospectus arise from a combination of the terms of issue of the New Options, the constitution of the Company, statute and general law.

The New Options offered under this Prospectus will be granted on the terms and conditions set out below:

- Each New Option entitles the holder to subscribe for one fully paid Share in the Company at an exercise price of 8 cents.
- The New Options will expire at 5:00 pm, on 31 January 2011.
- There is no obligation to exercise the New Options.
- As set out in section 2.9, Atlantic will apply for admission of the New Options to quotation on ASX within 7 days after the date of this Prospectus. If ASX does not grant Official Quotation of the New Shares and New Options within 3 months after the date of this Prospectus, Atlantic will not issue any New Options.
- If the Company offers Shares by way of a pro rata issue (except a bonus issue) to the holders of Shares (whether renounceable or non renounceable), the exercise price of a New Option will be reduced in accordance with the formula set out in ASX Listing Rule 6.22.2.
- If there is a bonus issue to the holders of Shares in the Company then the number of Shares over which each New Option is exercisable will be increased by the number of Shares which the holder would have received under the bonus issue if the New Option had been exercised before the record date for the bonus issue.

- In the event of any reorganisation (including a consolidation, sub-division, reduction, cancellation or return) of the issued capital of the Company, the rights of the New Option holder will be changed to the extent necessary to comply with the Listing Rules applying to a reorganisation of capital at the time of the reorganisation.
- New Options do not entitle the holder to:
 - participate in a new issue of Shares or other securities;
 - receive dividends; or
 - attend, or vote at, meetings of the Company, without exercising the New Option.
- To exercise a New Option, the holder must complete and execute a Notice of Exercise of Option in the form that will be forwarded to all New Option holders following the granting of the New Options, and must lodge the completed notice and payment of the exercise price with the Company Secretary at the Company's registered office at any time prior to the expiry date of the New Option.
- Shares issued on exercise of the New Options will be fully paid and will rank equally in all respects with all other fully paid Shares on issue. The rights and liabilities attaching to the Shares issued upon exercise of the New Options are the same as set out in section 7.4.
- The Company will apply for Official Quotation by ASX of the Shares issued upon exercise of the New Options within 10 Business Days of allotment of the Shares.
- Some or all of the New Options may be exercised at any one time or times prior to the expiry date of the New Option provided that (unless all New Options are being exercised) no less than 5,000 New Options are exercised at any one time.
- The Options are freely transferable

7.6 Effect on Options

As consequence of this Rights Issue, the exercise price of all issued Options may be altered in accordance with their terms of issue and consistent with ASX Listing Rule 6.22.

7.7 Underwriting Agreement

The Company has entered into an underwriting agreement with Patersons Securities Limited (Underwriter) dated 31 March 2009 (Underwriting Agreement) under which the Underwriter has agreed to fully underwrite the Rights Issue.

Under the terms of the Underwriting Agreement, the Underwriter is entitled to:

- a corporate advisory fee of \$60,000;
- underwriting fees equal to 5% of underwritten amount of \$3,317,063 (being \$165,880); and
- 15 million options on the same terms and conditions as the New Options, to be granted to the Underwriter or its nominee(s).

The amounts listed above are exclusive of GST.

In addition, the Company has agreed to pay, indemnify and keep indemnified the Underwriter for all costs incurred by the Underwriter in connection with the Rights Issue, including legal fees and disbursements and the reasonable costs of travel and accommodation, marketing and communication costs. The Company has given the usual warranties and covenants to the Underwriter expected in an agreement of this nature.

The Underwriter may terminate the Underwriting Agreement and be released from its obligations on the happening of any of the events listed in (a) to (s)(xxiv) below. However, the terms of the Underwriting Agreement provide that the Underwriter will underwrite the first \$1.5 million of the Offer without having available to it the benefit of market related termination clauses, specifically the termination events listed at clauses (a), (b), (c) and (s)(xxiv) below. This means that if the Underwriter terminates the Underwriting Agreement due to the occurrence of a termination event referred to in clauses (a), (b), (c) and (s)(xxiv) below, the Offer will no longer be fully underwritten but will only be underwritten up to \$1.5 million. If the Underwriter terminates the Underwriting Agreement but remains obliged to underwrite the Offer up to \$1.5 million, Atlantic will issue a supplementary or replacement prospectus and further details of the changes to the underwriting will be notified to shareholders through that document.

With regard to events listed under (s) below, before terminating the Underwriting Agreement, the Underwriter must determine reasonably and in good faith, and after consulting the Company, that the event has or would have a material adverse effect on the Offer, or could create a potential liability for the Underwriter under the Corporations Act.

Defined terms in item (a) to (s) below have the same meaning as given to them in the Underwriting Agreement.

- (a) (**Indices fall**): the All Ordinaries Index (IRESS XAO.ASX) as published by ASX is for 3 consecutive days after the date of the Underwriting Agreement is 10% or more below its respective level as at the close of business on the Business Day prior to the date of the Underwriting Agreement;

- (d) (**Prospectus**): the Company does not lodge the Prospectus on the Lodgement Date or the Prospectus or the Offer is withdrawn by the Company;

7.8 3 March 2009 Placement

On 3 March 2009, Atlantic placed 6.8 million fully paid ordinary shares at 5 cents per share to existing Company cornerstone shareholders to raise \$340,000 (Placement). The Placement was made on the basis that if Atlantic raised further capital within the next 3 months on less favourable terms to the Company, additional securities would be issued to the shareholders who participated in the Placement so that as far as practicable the Placement would be on the same terms as any such capital raising.

Accordingly, on 3 June 2009, an additional 1.7 million Shares and 850,000 New Options will be issued to the shareholders who participated in the Placement.

7.9 Privacy

Atlantic collects information about each Eligible Shareholder provided on any Entitlement and Acceptance Form and Renunciation and Acceptance Form (if required) or Shortfall Application Form for the purpose of processing applications for New Shares and New Options, transferring Rights and to administer the Eligible Shareholder's or applicant's security holding in Atlantic.

By submitting an Entitlement and Acceptance Form, Renunciation and Acceptance Form or Shortfall Application Form, each Eligible Shareholder (or other person consenting to submitting the relevant form) agrees that Atlantic may use the information provided on those forms for the purposes set out in this privacy disclosure statement and may disclose it for those purposes to Atlantic's share registry, related bodies corporate, agents, contractors and third party service providers, including mailing houses and professional advisers, and to ASX and other regulatory authorities.

The Corporations Act requires Atlantic to include information about the security holder (including name, address and details of the securities held) in its public register. The information contained in Atlantic's public registers must remain there even if that person ceases to be a security holder of Atlantic. Information contained in Atlantic's register is also used to facilitate distribution payments and corporate communications (including Atlantic's financial results, annual reports and other information that Atlantic may wish to communicate to its security holders) and compliance by Atlantic with legal and regulatory requirements.

If the information required on an Entitlement and Acceptance Form, Renunciation and Acceptance Form or Shortfall Application Form is not provided, Atlantic may not be able to accept or process the application.

A Shareholder has a right to gain access to the information that Atlantic holds about that person subject to certain exemptions under law. A fee may be charged for access. Access requests must be made in writing to Atlantic's Company Secretary at Atlantic's registered office.

The registry operates an electronic issuer-sponsored sub-register and an electronic CHESS sub-register. Both these sub-registers constitute Atlantic's principal register of Shareholders.

Holders of New Shares and New Options will not receive a share certificate but will receive a statement of their holding. If an Eligible Shareholder is sponsored by a broker or other participant in CHESS, that person will receive a CHESS statement which will set out the number of New Shares and New Options issued to them under this Prospectus, provide details of their HIN (holder identification number), and provide the participant identification number of the sponsor.

During the 2008 financial year, as consideration for providing an additional \$1 million loan facility (fully drawdown June 2007 and fully repaid November 2007) and for re-negotiating the terms of the original \$2 million loan agreement, CRX was provided with an additional 2.5 million Options at an exercise price of 15 cents per Option such that CRX now has 7.5 million Options with an exercise price of 15 cents per Option expiring on 27 December 2009. \$702,000 of the original \$2 million loan facility was repaid by the issue of 5.4 million shares.

The CRX Loan was amended and restated, with effect from 27 December 2008, whereby CRX elected to convert \$640,456.89 of the outstanding CRX Loan principal into 12,735,043 fully paid Shares. Currently, approximately \$444,000 of the CRX Loan remains outstanding and is due to be repaid in full by 27 January 2010.

The Company wishes to retire this debt in its entirety as soon as commercial priorities permit.
